

Angel

Neil Diamond

Maybe tonight I will say what's on my mind
But the words are, oh, so hard to find
When I try to speak it comes out like nervous chatter
Then my knees get weak and I can't stop shaking I try to relax 'cause I must maintain my cool
She knows I'm here if I don't make a move right now
She's goin' to disappear Angel, I never met a girl that looks like you
Do-do-do, do you even care
Angel, there's nothing in the world
That I won't do for you, angel I followed you home and imagined me with you
Girl, I should have known when I tried to dial your number
I'd hang up the phone, angel, did you answer Angel, I never met a girl that looks like you
Do-do-do, do you even care
Angel, there's nothing in the world that
I won't do for you, angel And every time we meet
I feel like I got two left feet
And you, you know what I'm goin' through When I try to speak it comes out like nervous chatter
Then my knees get weak and I can't stop shaking Angel, I never met a girl that looks like you
Do-do-do, do you even care?
Angel, there's nothing in the world
That I won't do for you, angel Angel, I never met a girl that looks like you
Do-do-do, do you even care?
Angel
