

# Better Off Now

## Pillar

All of this is changing, none of this seems real  
I just keep on waiting to see if I can feel  
Something like an angel watching over me  
Maybe that's exactly what's in front of me  
'Cause I'm better off now since You came around  
You've gone and shown me everything I needed just  
To see that I am better off now since You came around  
All I had to do is see what I could be  
So I could know I'm better off now  
I've wasted so much time now just to try and find  
The answer to the question, I've tried so hard to hide  
I never knew emotions could ever run this high  
I was so far down, I lost the will to try

But I'm better off now since You came around  
You've gone and shown me everything I needed just  
To see that I am better off now since You came around  
All I had to do is see what I could be  
So I could know I'm better off now  
Day after day, I threw it all away  
I'm never turning back that way again  
'Cause I'm better off now since You came around  
You've gone and shown me everything I needed just  
To see that I am better off now since You came around  
All I had to do is see what I could be  
So I could know I'm better off now
