Coma

Issues

Everybody needs loving sometimes
Physical emotion, alright, babe
To see your face light up
Will give me nothing but bliss
And when I start showing up
I never know when to quitSay something, I'm not giving up on you
I'll stay as long as I need toI wanna be all you think about
Anything and everything you dream about
As if I had it all figured out
I wanna be the one you can't breathe withoutIt might be hard to play it cool
'Cuz I know that's not what gentlemen do
When I'm hurting just know you're fighting
Listen to me reminiscing and [?] I've got youSay something, I've got a lot to lose
I'd say that you're not gonna pull throughI wanna be all you think about
Anything and everything you dream about
As if I had it all figured out
I wanna be the one you can't breathe without
If you can open your eyesI don't know where you are
In your mind but listen to your soul
Try to find it's way back to your heart
From the cot in the ER
Just thank me and pull yourself back to creationI wanna be all you think about
Anything and everything you dream about
As if I had it all figured out
I wanna be the one you can't breathe without
If you can open your eyes
