

# Nikita

## Dark Age

I heard the nations are threatened by crisis  
A curse from east, where the demon rises  
The sin is changing the face of this earth  
While we are waiting for the darkest birth

The coming vision

Was our decision

Can it be

That all we need

Is a resistant breed

The harming cast

Flourishing fast

Can it be

That this is it

The final exit

No  
There is no way out of guilt when you free the deceiver

So wont you, wont you please spread disease Nikita

No

There is no way out of guilt when you kill a believer

So wont you, wont you please spread disease Nikita  
Politics shaped the organic statement

A lifeless planet as a final judgement

The sickness in me is the sickness in you

The bitter response to the things that we do  
Angry virus free us please

From the scum on this earth with a painful disease

Angry Nikita if this won't be

We will destroy ourselves one day else you will see
