Fade Away

Celine Dion

I learned from the past not everything lasts
I understand that now
Everything changed when you walked away
But I'll survive somehowThough I have regrets
I'll learn to forget and just keep moving on
Cause when love is gone
You have to be strongOnce touched by pain you're not the same
But time can heal your heart again
So let the clouds that bring you down
Just fade away, awaySo I try to smile but after a while
The memories come back
But I won't give in cause I know that then
My heart will fade to blackAnd this time I learned that love can burn
To an all consuming flame
There's no right or wrong
I've got to be strongOnce touched by pain you're not the same
But time can heal your heart again
So let the clouds that bring you down
Just fade awayI know that one day I'll find that feeling again
But until I do I'll do it fine by myselfOnce touched by pain you're not the same
But time can heal your heart again
So let the clouds that bring you down
You know thatOnce touched by pain you're not the same
But time can heal your heart again
So let the clouds that bring you down
So let the clouds that bring you down
Just fade away, away
