

# Fade Away

Celine Dion

I learned from the past not everything lasts  
I understand that now  
Everything changed when you walked away  
But I'll survive somehow Though I have regrets  
I'll learn to forget and just keep moving on  
Cause when love is gone  
You have to be strong Once touched by pain you're not the same  
But time can heal your heart again  
So let the clouds that bring you down  
Just fade away, away So I try to smile but after a while  
The memories come back  
But I won't give in cause I know that then  
My heart will fade to black And this time I learned that love can burn  
To an all consuming flame  
There's no right or wrong  
I've got to be strong Once touched by pain you're not the same  
But time can heal your heart again  
So let the clouds that bring you down  
Just fade away I know that one day I'll find that feeling again  
But until I do I'll do it fine by myself Once touched by pain you're not the same  
But time can heal your heart again  
So let the clouds that bring you down  
You know that Once touched by pain you're not the same  
But time can heal your heart again  
So let the clouds that bring you down  
So let the clouds that bring you down  
Just fade away, away
