

Summertrain

Greyson Chance

Come with me for a little ride, see the shadows passing by
Look at the sun and see the clouds turn to faces in the sky
We've been awake all night, shattered dreams all around

Close your sad, sad eyes we will be safe and sound
Come with me for a little ride, see the shadows passing by
Look at the sun and see the clouds turn to faces in the sky
Daydreaming lightly through the rain

All's forgiven on a summer train

Come with me for a little ride, see the shadows passing by
Seems we are a thousand miles away from last night

As you sigh in my ear, kiss the rain goodbye

Come with me for a little ride, see the shadows passing by
Look at the sun and see the clouds turn to faces in the sky
Daydreaming lightly through the rain

All's forgiven on a summer train

Come with me for a little ride, see the shadows passing by

Come away with me, it's gonna be all right just breathe

Come away with me, it's gonna be all right you'll see

And the windows are crying, but this train is flying us all through the rain, I fear

And the sky is getting brighter with every mile

And it all seems clear

Come with me for a little ride, see the shadows passing by
Look at the sun and see the clouds turn to faces in the sky
Daydreaming lightly through the rain

All's forgiven on a summer train

Come with me for a little ride, see the shadows passing by
Come away with me, it's gonna be all right just breathe

Come away with me, it's gonna be all right you'll see

Come away with me, it's gonna be all right just breathe

Come away with me, it's gonna be all right you'll see, you'll see

Come away with me
