Head First

Junip

I keep asking myself
how it came tumbling down down down down down
let's lock into place like a puzzle
resolving all my troubles whirling around

And it left me wondering]
should I jump into this < 2x
head first or feet first]

And I thought to myself
would things ever calm down

You pick me up from my maze
and show me the world up from the clouds

I'm on my way back should it be head first, or feet first

Head first, or feet first .... Repeat
