

Body Talk

ã, -ãf-ã, xã, ,ãf¹/4ã, ±ãf³ãf•ãf³ãf%o

Tonight you gotta trust me, girl
It's all about actions, not about words
Got plans for you, what you want me to
Girl, I will do, you can pick and choose
 You know that I'll lay it on
On the back of my bike you'll be holding on
 In the day take pictures in the sun
 In the night let the city lights turn us on
 We can take it back to the crib
You can show me what you're working with
 Open up and let me in
 Let your body do the talking
 Now that we're finally all alone
I'm gonna give you something worth waiting for
 So let's just hurry and get it on
 Let your body do the talking
 Let your body do the talking
 Let your body talk
 You can let your body talk
 Let your body do the talking
 Let your body talk
 Just let your body talk
 Come on
 Wake up, it's a brand new day
 And I've got plans to make you happy
 Lace you with diamonds, a girl's best friend
 Just watch me closely, I'll break you in
 Come on, let's hit the club
 No time for talking, just rave non-stop
 As the tempo slows, it's time to leave
As you look in my eye, you know what I need
 We can take it back to the crib
I can show you what I'm flexing with
 Open up and let me in
 Let your body do the talking
 Now that we're finally all alone
I can give you that something you've been waiting for
 So let's just hurry and get it on
 Let your body do the talking

Let your body do the talking
 Let your body talk
 You can let your body talk
Let your body do the talking
 Let your body talk
 Just let your body talk
Let your body do the talking
 Let your body talk
 You can let your body talk
Let your body do the talking
 Let your body talk
 Just let your body talk
 So many things I'd like to do
So many ways to make your body move
 Now you're home with me
 We can have a private party
 Come get down with me
 So come on
Get down through the night
 It's alright, so come on
Let your body do the talking
 Let your body talk
 You can let your body talk
Let your body do the talking
 Let your body talk
 Just let your body talk
Let your body do the talking
 Let your body talk
 You can let your body talk
Let your body do the talking
 Let your body talk
 Just let your body talk
 Come on
