

Undone

I Mother Earth

Living alone, body shaking
Cars outside they're singing their songs
The candles wave and I get to thinking
How people see things and deal with them in different ways
Trying to move forward like a walk underwater
Two steps back like a walk through silent streets
I've heard the word, guess I'm tired of trying
Everybody I'm saying the pop is gone
Fighting the fight with the waterline
Catching breath and a dirty breeze
What's been used up has been more than needed
One river rolling, two rivers going dry
I'm down undone
I'm down undone then gone
Behind, beyond
Soft hands that touch the sun
I'm down undone
I'm down undone then gone
Behind, beyond
Soft hands that touch the sun
Down, down, down, down, I am
