

Diabolus

Nycticorax

I'm at the darkest side of life
I've crossed the demon's paradise
I've seen the fallen angels' eyes Some call this state insanity
It's just as dark as it can be
There's no way out I won't be free Can someone hear my call?
Come and help me through it all
Can you ease the pain?
So my life won't be in vein I'm heading to the stars
But the road won't lead no longer
Up to the sunrise it won't heal
The liberty seems far away Can't find the way
The vision won't be clearer
I see blood on my hands
No more footprints in the sand
Diabolus All through my life is close to hell
I know my crime, I know it well
There's no regret for me to tell I'm lost inside my misery
I've prayed to God to set me free
But there's a darker voice inside of me Can someone hear my call?
Come and help me through it all
Can you ease the pain?
So my life won't be in vein I'm heading to the stars
But the road won't lead no longer
Up to the sunrise it won't heal
The liberty seems far away Can't find the way
The vision won't be clearer
I see blood on my hands
No more footprints in the sand Unleash me from my chains, who am I?
I'm a slave under my own failures
I'm a sinner that lives in a lie
I've been down to the deepest valley
But who am I? Please help me Can someone hear my call?
Come and help me through it all
Can you ease the pain?
So my life won't be in vein I'm heading to the stars
But the road won't lead no longer
Up to the sunrise it won't heal
The liberty seems far away Can't find the way
The vision won't be clearer

I see blood on my hands
No more footprints in the sand
DiabolusUnleash me from these chains
Release me from this pain
I'm lost in miseryUnleash me from these chains
Release me from this pain
I'm lost in misery
