Nowhere

Wild Nothing

You're more than close, then I should suck you in
The faith laughs at me so I await for you hopelessly
Wasting the morning, wasting the after noon
I'm just your slow death.
Hard trust, no trust, I'm just your dust
Don't come over, unless you wanna feel something
I like your short ... just to make you hurt
But for love, for nothing, I can't replace you
In the dreams, and dreams, I wake you up
I'll go nowhere, I'll go nowhere,
I'll go nowhere without you, without you
Your candle burns, it burns my finger tips
You have a ... that I never knew
Your sidekick charmer can tell my future
You falling away from me, falling away from me
I'll go nowhere, I'll go nowhere,
