

## Pain

# Robert Francis

Ooh  
Ooh  
Close your eyes, I wanna drown in you  
Tear me up, tell me the truth  
I want you when you're sorry  
And you want me when your always  
I said all I ever wanted,  
All I ever wanted was you  
And you're still the one to break my heart  
Still the one to tear it apart  
Still the one to call me names  
I said all I ever wanted  
All I ever wanted was pain.  
Ooh  
Both of us, behind a window of dreams  
Open wide, (to all machines)  
Oh I want you when you're sorry  
And you want me when your always  
I said all I ever wanted,  
All I ever wanted was you  
And you're still the one to break my heart  
Still the one to tear it apart  
Still the one to call me names  
I said all I ever wanted  
All I ever wanted was pain.  
Ooh  
you're still the one to break my heart  
Still the one to tear it apart  
Still the one to call me names  
I said all I ever wanted  
All I ever wanted was pain.  
Still the one to break my heart  
Still the one to tear it apart  
Still the one to call me names  
I said all I ever wanted  
All I ever wanted was pain.
