

Electricity (Live, 1968)

Captain Beefheart

Me to you to me
Thunderbolts caught easily
Shouting truth peacefully
Electricity High voltage, man
Kids his night to bring the light
To those who need to hide their shadow deep
Though it's too bright, find the light
And know that friends don't mind
Just how you glow Midnight cowboys steers in black
Hit dark roads without a map
To free, seek electricity, seek electricity
Midnight cowboys steers in black
Hit dark roads without a map
To free, seek electricity, seek electricity Lighthouse beacon straight ahead
Straight ahead, across black seas
To bring, seeking electricity High voltage, man
Kids his night to bring the light
To those who need to hide their shadow deep
You are a shallow deed High voltage, man
Kids his night to bring the light
To those who need to hide their sanity
You are insanity Seek electricity, seek electricity
Seek electricity, seek electricity
Seek electricity, seek electricity
Seek electricity, seek electricity
Electricity
