

Ladybird

Beach Baby

I wanna be your lover
You got something don't wait
Yeah you know it's true
I wanna be your brother
Take a bite of the apple and just spit it out
I wanna be your mother
Raise you up and fuck, fuck you right up
I wanna be your sister
Hold you time and time out through the night I don't wanna think about it
I don't wanna think about it
I don't wanna live for nothing
I don't wanna live
I don't want another
I only want you, you
You're my LADYBIRD
I wanna roll together
Straight from the salty sea
Yeah it's you and me
I wanna be your father
I know that's true for you
Yeah just you and me
I wanna be your other
Only time and time out through the night I don't wanna think about it
I don't wanna think about it
I don't wanna live for nothing
I don't wanna think about it
I don't wanna think about it
I don't wanna live for nothing
I don't wanna live
The wall along dark blow
A center always known???
Take a shot and think out I don't wanna think about it
I don't wanna think about it
I don't wanna live for nothing
I don't
