

# Outside Inside

## The Pop Ups

voices are great  
we use them to create  
and we're here to demonstrate  
their most fantastic trait when we're outside we can play  
to shout outside's okay  
because the sound just goes away Hey Jason, can I be loud outside?  
you may! inside you must change  
you see, because the sound is more contained so quiet we remain,  
and from yelling we refrain we're loud when we are outside  
and quiet when we are inside...
