

Windshield

[Amanda Bergman](#)

I keep my heart up on the windshield
where I left it for the spring
To handle all the wills
and stupid things I can't keep in I be a forest and a sail
I throw my debts with every win
and send along the bills
with broken bills I can't give in So won't you drop me a lie
or save it for the thrill of it
almost died
and now we even talk Conquer the mind and get over here
It's a short short while that I have
Have you here
I sought my head out to a vision
of a question
Where are we
if stranded on a ship behind a picture
of the sea I can't remember honey
think when you are near
so I leave you be
Direction took a spin
Life lack relay
I'm late to leave So now I'm crossing the line
See it from the other side
Almost died
and now we even walk Conquer the mind and get over here
It's a short short while that I have
I have you here
So now I'm crossing the line
see it from the other side
Almost died
and now we even walk Conquer the mind and get over here
There's a short short while that I have
I have you here
