

Let It Out

Eyeshine

Here I am
The still frames locked inside
I'm feeling numb
The city lights somehow disappear
I need you here

Why can't I figure it out?
It's times like these that are holding me down
A million minutes spent in line
But only one chance to make it right

I can't let this take me over
I'm gonna let it out

I'm losing sleep
Playing back the scene I come undone
Familiar streets I roamed when I was young
Forget my name

I won't let this take me over
I gotta let it out

Like towers made of sand
I fall again

I won't let this take me over
I gotta let it out
I gotta let it out
I gotta let it out
I'm gonna let it out
