

Cheater's Dilemma

Kay B

I need to know girl where do we go from here
Now that it's all up in the atmosphere
I found out that you cheated on me
Like I cheated on you with her
Now we're even what happens from here

Ain't nobody got what I got when I do it to you
Better believe it baby
So you could do your thing on your own
Hope you're ready cause we are falling apart
This ain't no time to cry
Baby dry your eyes
I can't figure what's wrong with me
Thought that I'd be ready
But just like in the pictures on the wall
Who's gonna be callin me
And even if I go and take 'em off
Your face keeps haunting me
It ain't your fault and it's not my fault
But we got to separate
Said it ain't your fault and it's not my fault
Girl we got to break away

I need to know girl where do we go from here
Now that it's all up in the atmosphere
I found out that you cheated on me
Like I cheated on you with her
Now we're even what happens from here

We used to be the ones people thought
We were hot and we're gonna get married baby
But now three years on and now
It seems we just wasted time
But how was I to find
You were his and mine
I was blind and couldn't see
Cause I was getting mine
I know I see the writings on the wall
How could she still love me

I'm thinking should I stay or should I go
Cause she just betrayed me
It ain't your fault and it's not my fault
But we got to separate
Said It ain't your fault and it's not my fault
Girl I'm thinking we should stay

I need to know girl where do we go from here
Now that it's all up in the atmosphere
I found out that you cheated on me
Like I cheated on you with her
Now we're even what happens from here

Girl I'll break my pride and say this
I know that we both crossed forbidden ranges
Let's take our time
Go across the river
Back to the place we begun

But first I need to know girl where do we go from here
Now that it's all up in the atmosphere
I found out that you cheated on me
Like I cheated on you with her
Now we're even what happens from here

I need to know girl where do we go from here
Now that it's all up in the atmosphere
I found out that you cheated on me
Like I cheated on you with her
Now we're even what happens from here

I need to know where do we go from here
Now that it's all up in the atmosphere
I found out that you cheated on me
Like I cheated on you with her
Now we're even what happens from here
