

Colony

In Flames

It's your world, the day is a threat
In my world, there is an absence of light
Genetic superior cell
Controlled by the fathomless and unbearableA radical new form
Of plastic and rage
Biologically optimized
But with a strangling pulseAnd your world, do you find me worthy?
In my world, I parachute my life
A virtual drugstore
Populated by the fathomless and unbearableMachine, meat and blood
In an intimate relationship
The new, superior
More effective than all the precedingWhen we can no longer cry
Reality is torn
Then it's easy to forget
That the responsibility lies on us allWhen we can no longer cry
Reality is torn
Then it's easy to forget
That the responsibility lies on us allI reach your world, the night is no threat at all
Darkness transforms to a vision of hell
Populated by the fathomless, unbearable
