

# Wildfires

## Coasts

You're forcing me  
Using that witchcraft  
And sorcery to torture me  
It's something we can't control running like a wildfire  
Something irrational running like a wildfire  
Don't think it's natural running like a wildfire  
And we're starting the wildfire  
You let it slip  
You like me biting on my bottom lip; thunder and lightning  
A lick of sweat invite me somewhere we can finish this thunder and lightning  
And I don't know how, but you aligned my stars  
And somehow forever doesn't seem so far  
I don't know how, but you aligned my stars  
It's something we can't control running like a wildfire  
Something irrational running like a wildfire  
Don't think it's natural running like a wildfire  
And we're starting the wildfire

It's something we can't control running like a wildfire  
Something irrational running like a wildfire  
Don't think it's natural running like a wildfire  
It's like we're animals, it's like we're animals  
Your sight blurs  
You can't find the right words well that's fine  
Your friends left it's last call  
I lit your cigarette and I saw the future in the flames  
The future in the flames  
It's something we can't control running like a wildfire  
Something irrational running like a wildfire  
Don't think it's natural running like a wildfire  
And we're starting the wildfire

It's something we can't control running like a wildfire  
Something irrational running like a wildfire  
Don't think it's natural running like a wildfire  
It's like we're animals  
It's like we're animals
