Walking in the Sun

Travis

I was walking along in the sun
Taking pictures of everyone
And there's something on the tip of my tongue
OhWell it's easy to see from afar
And it's easy to be on your guard
But it's harder just to be who you are
OhWhen all these
People who will lead you down the back of the track
They're on your back
They will try and tear you apart
But believe and you will see that there's no reason to doubt
Then you will find
You can do much better than that
If you think of all the things that you feel
All the voices in your head that you hear
It's a mystery that we are all still holding onWhen all these
People who will lead you down the back of the track
They're on your back
They will try and tear you apart
But believe and you will see that there's no reason to doubt
And you will find
You can do much better than thatIf you see me hit the ground
Don't come near don't make a soundI was walking along in the sun
Taking pictures of everyone
And there's something on the tip of my tongue
