

The Riding Song

RollerBlue

It's funny how I'm thinking, just dreaming
Maybe what my life would be
I'm feeling like I'm riding, very slowly
On a journey with no end

Step one says fall in love
Then there's no way out and you're half way there
Once more and turn around
But before you know you're just lost and found

I'm thinking that I'm travelling, on a highway
Destination open plan
I'm knowing that you're out there
Trying to find one
Chance to play without a care

Step one says fall in love
Then there's no way out and you're half way there
Once more and turn around
But before you know you're just lost and found

It's too late to change, too late to say
Take it in your stride, now walk away
You're not that kind, you're living on borrowed time

It's funny how I'm thinking, just dreaming
Maybe what my life would be
I'm feeling like I'm riding very slowly
On a journey with no end

Step one says fall in love
Then there's no way out and you're half way there
Once more and turn around
But before you know you're just lost and found

It's too late to change, too late to say
Take it in your stride, now walk away
You're not that kind, you're living on borrowed time

Step one says fall in love

Then there's no way out and you're half way there
Once more and turn around
But before you know you're just lost and found

It's too late to change, too late to say
Take it in your stride, now walk away
You're not that kind, you're living on borrowed time
