## **Please**

## **Pete Murray**

For always I'll see you there For always I'll hold your hand For always be your man Please say something I won't to and To this morning I have to go and All is nothing without you, without you Without you, without you For always I'll see you there For always I'll hold your hand For always be your man Be your man, be your man, be your man Be your man, be your man Please say something I won't to and To this morning I have to go and All is nothing without you, without you Without you, without you Please, please, please say something
