

# Believe the Lie

## Umphey's McGee

Let this become memory, the worst is yet to come  
And all these points we've argued, yo, we still agree on some  
And when all faith is lost is it alright to laugh? You can lead with all new lines  
If you believe in what you'd say  
And life can be just as you make it  
Believe the lie and it will all come true Believe in every lie  
You're never free to walk away  
You should be free to go today  
Believe the lie and it will all come true
