

# Flashover

## Klaxons

Myriads of silver discs  
Signals have been noticed  
Out on the drift Here comes the flashover  
From our new neighbor  
Here comes the flashover  
Behold new colors Messages, fresh images  
The over mind  
Has noticed another shift Never seen before  
Others bring new dawns  
Colored grays are on display  
The waiting is no more Never seen before  
Others bring new dawns  
Imagination's opening  
Inviting us on board Here comes the flashover Myriads of silver discs  
The over mind  
Has signaled another lift Dimensions of time have come undone  
Now we have become so unalone Migration, space, extensions, differences  
Information increases becoming  
What the mystery is
