

We Tell Ourselves

[Clint Black](#)

I ought to know the look in another's eyes
When there's something on their mind
I think I saw that look in a lover's eyes
They were looking into mine Like we both had found the one we want
But found the one we wanted just quit trying So we tell ourselves that what we found is what we meant to find
That's what we tell ourselves, you won't believe the things
A heart could tell a mind
Somehow we sell ourselves on love
I just don't think I'll believe my heart this time I ought to know the language well
I've heard me tell myself these things before
I finally made my mind up, my heart tells me to look for something more
Determined not to wind up wondering was she the one
Well, you never can be sure So we tell ourselves that what we found is what we meant to find
That's what we tell ourselves, won't believe the things
A heart could tell a mind
Somehow we sell ourselves on love
I just don't think I'll believe my heart this time Yeah, we tell ourselves that what we found is what we meant to
find
That's what we tell ourselves, won't believe the things
A heart could tell a mind
Somehow we sell ourselves on love
I just don't think I'll believe my heart this time
