

Connected

Paul Van Dyk

No one else will help us to get through
So by ourselves, we'll know just what to do We are connected, we'll never be alone
We walk together forever down that road You and I will share all that we know
So close your eyes and just let yourself go We are connected, we'll never be alone
We walk together forever down that road
We are connected, we'll never be alone
We walk together forever down that road, road And if you fall behind and don't know what to do
I promise I'll be waiting there for you, for you Follow me into a better day
We'll be alright, no matter what they say We are connected, we'll never be alone
We walk together forever down that road
We are connected, we'll never be alone
We walk together forever down that road
Road, road, road
