

All I Have

Side Walk Slam

Foggy road my visions blurred
Have I lost my sight of you?
Distractions rise
To grab attention I long to see this vision through
(I give it up to you)
Please guide our steps
So that we may follow All I have
It's all yours Step by step we'll see this through
The past behind us
Step by step we'll see this through
The past behind Die to myself for something new
As I put my trust in you
I'm giving all
Complete surrender I long to see this vision through
(I give it up to you)
Please guide our steps
So that we may follow All I have
It's all yours Step by step, we'll see this through
The past behind us
Step by step, we'll see this through
The past behind All I have
It's all yours All I have
It's all yours
