# Like

## HeyMike!

Make it funky like this, oh, oh, oh, oh, oh
Make it funky like this, oh, oh, ooh, oh, oh
Check it
You might think that we're totally different
Your hair is blue, mine's brown but it's okay
You might think that we're totally different
I like Miley Cyrus, I like Kelly Clarkson
You might think that we're totally different
I don't really think so, maybe in a photo
I know that underneath
You just want the same things as me
Like love, like friends, like a place to go
Where you can switch it up, kick it when you're feeling low
Like fun, like tunes when you crank it up
With a beat so crazy that it makes you jump
Like hope, like faith, like something to dream
Like you can see it in your mind, like it's all HD
Everybody needs something like, like
Everybody needs something like, like
You may think that I just don't get you
Wouldn't understand you, anything you go through
You might think that I wouldn't accept you
But hold up, wait a minute, gotta put some truth in it
You might think that we're totally different
I don't really think so, maybe in a photo
I know that underneath
You just want the same things as me
Like love, like friends, like a place to go
Where you can switch it up, kick it when you're feeling low
Like fun, like tunes when you crank it up
With a beat so crazy that it makes you jump
Like hope, like faith, like something to dream
Like you can see it in your mind, like it's all HD
Everybody needs something like, like
Everybody needs something like, like
I'm not saying that we're both the same
You gotta have sun and you gotta have rain
Life goes up and life goes down
We need each other for the world to go round, yeah, yeah

Like love, like friends, like a place to go
Where you can switch it up, kick it when you're feeling low
Like fun, like tunes when you crank it up
With a beat so crazy that it makes you jump
Like hope, like faith, like something to dream
Like you can see it in your mind, like it's all HD
Everybody needs something like, like
Everybody needs something like, like
Like love, like friends, like a place to go
Where you can switch it up, kick it when you're feeling low
Like fun, like tunes when you crank it up
With a beat so crazy that it makes you jump
Like hope, like faith, like something to dream
Like you can see it in your mind, like it's all HD
Everybody needs something like, like
Everybody needs something like, like
