1000 Years

The Inconvenience

First I stand then I crawl I became all mankind as I drip
From mine eyes I washed away to a smaller size we'll wait
One-thousand years until the end of time we'll wait one-
Thousand more dressed up in gold and white we'll climb
The mountain sides to find whats in the sky we'll dig
Through mountain sides to find what's deep inside if we
See what we need we'll find it don't make who we be if we
Try would we find that what we need is more than time
We'll wait one-thousand years until the end of time we'll
Wait one-thousand more dressed up in gold and white we'll
Climb the mountain sides to find whats in the sky we'll
Dig through mountain sides to find what's deep inside
I've got everything you need the friends you help need

Everything what you need what you need? you can help out
All your friends in need but the friends you help need
Everything what you need what you need first you stand
Then you crawl then you stand to be reborn we'll wait
One-thousand years until the end of time we'll wait one-
Thousand more dressed up in gold and white we'll climb
The mountain sides to find whats in the sky we'll dig
Through mountain sides to find what's deep inside you can
Help out all your friends in need but the friends you
Help need everything what you need what you need I've got
Everything you need the friends you help need everything
What you need what you need?
