

Here With Me

Michelle Branch

It's been a long, long time
Since I looked into the mirror
I guess that I was blind
Now my reflection's getting clearer
Now that you're gone
Things will never be the same again
There's not a minute that goes by
Every hour of every day
You're such a part of me
But I just pulled away
Well, I'm not the same girl
You used to know
I wish I said the words I never showed
I know you had to go away
I died just a little, and I feel it now
You're the one I need
I believe that I would cry just a little
Just to have you back now
Here with me
Here with me
You know that silence is loud
When all you hear is your heart
And I wanted so badly
Just to be a part
Of something strong and true
But I was scared and left it all behind
I know you had to go away
I died just a little, and I feel it now
You're the one I need
I believe that I would cry just a little
Just to have you back now
Here with me
Here with me
And I'm asking a on ah
And I'm wanting you
To come back to me please
I never will forget that look
Upon your face
How you turned away
And left without a trace
But I understand that you did what you had to do
And I thank you
I know you had to go away
(Alright, I know you had to go away)
I died just a little, and I feel it now
(Ohh)

You're the one I need
(Ohh ohh)
I believe that I would cry just a little
(Just to have)
Just to have you back now
(Ohh ohh)
Here with me I know you had to go away
(Alright, I know you had to go away)
I died just a little, and I feel it now
You're the one I need
(The one I need)
I believe that I would cry just a little
(Cry just a little)
Just to have you back now
Here with me Here with me
Here with me
