Run For Cover

[Petra](#)

You must have seen the light somewhere along the way
The flashing warning signs that you would not obey
You ran the roadblock before the danger zone
You cut the lifeline, now you're on your ownRun for cover, better get under authority
Run for cover, better listen to somebody
Like the lone ranger running through the night
With no one to tell you if you're wrong or right, run for coverYou want to call the shots, you want to take control
You want to throw the dice and gamble with your soul
Taking the liberties, grace will not afford
Is He your Master, can you call Him Lord?Run for cover, better get under authority
Run for cover, better listen to somebody
Like the lone ranger running through the night
With no one to tell you if you're wrong or rightWhy do you stand out in the rain?
What do you think you have to gain?
When you try in your own strength but don't prevail
The arm of flesh will always failRun for cover, better get under authority
Run for cover, better listen to somebody
Like the lone ranger running through the night
With no one to tell you if you're wrong or rightRun for cover, better get under authority
Run for cover, better listen to somebody
Like the lone ranger running through the night
With no one to tell you if you're wrong or right, run for cover
