One of Your Nights

Aaron Watson

I've had one of those days
Good for nothing kind of days
I've had hard luck, bad luck and no luck at all
Girl I need you to be my soft place to fallSo lay your pretty head on my side of the bed
I turn it on and on
When I turn off those bedroom lights
Say you want me to stay
Kiss my worries away
Far away
I've had one of those days
Before nothing kind of days
Baby I need one of your nightsI want to hold you tight
Fine wine and candle lights
I've had red lights, bar fights
Bright lights blinding me
Girl I need your touch to set me freeSo lay your pretty head on my side of the bed
I turn it on and on
When I turn off those bedroom lights
Say you want me to stay
Kiss my worries away
Far away
I've had one of those days
Before nothing kind of days
Baby I need one of your nightsGirl we got that kind of romance
One that will dance without even touching the ground
Remember that night on your street
I said I'd sweep you of your feetWell forever is forever
And I'll never gonna let you down
Never ever gonna let you downSo lay your pretty head on my side of the bed
I turn it on and on
When I turn off those bedroom lights
Say you want me to stay
Kiss my worries away
Far away
I've had one of those days
Before nothing kind of daysBaby I need one of your nights
One of your nightsI've had one of those days
Good for nothing kind of days
