

Legends

Kerli

We're the world's new invention
A brand new generation
From your imagination
We're coming, we're coming
With the words that must be spoken
Our hearts cannot be broken
And innocence comes with wisdom
We're coming, we're coming We're already legends
We're already legends
We're already legends
We're just young, we're just young
We're already legends
We're already legends
We're already legends
We're just young, we're just young
Legends, legends, legends
We're just, we're just, we're just
We're just, we're just, we're just
We're just young, we're just young We're the world's new creation
An independent nation
Sent to be courageous
We're coming, we're coming
With the sound that's so infectious
No choice but to respect us
There's no way you'll neglect us
We're coming, we're coming
We're already legends
We're already legends
We're already legends
We're just young, we're just young
We're already legends
We're already legends
We're already legends
We're just young, we're just young Legends, legends, legends
We're just, we're just, we're just
We're just, we're just, we're just
We're just young, we're just young We're just, we're just, we're just
We're just young
