

San Francisco

Out With the Old

Would you tell me
Everything you said to him
While saying the same thing to me
And I really hope you know
That everything I do

I'm doing it, for you What did you think about those three days you were gone?

Did you miss me and everything I said to you

Like I miss you

Oh god I love you

Won't you just come back

And take away this pain tonight I'll still love you

With your hands on his hips

And your lips on his cheek

How did it come to this?

And I really hope you know

The thought of you

With any other boy is making me sick What did you think about those three days you were gone?

Did you miss me and everything I said to you?

Like I miss you

Oh god I love you

Won't you just come back and take away this pain tonight I guess at the end of it

I just wanted someone to tell me

It's all going to be alright What did you think about those three days you were gone?

Did you miss me and everything I said to you?

Like I miss you

Oh god I love you

Won't you just come back and take away this pain tonight I guess at the end of it

I just wanted someone to tell me

It's all going to be alright
