Advent In Ives Garden

Sin Fang Bous

Drives herself, but where too?
Won't follow me or go around me
She goes to the rail clockwork
Went out, went out, went round the backIt's close to the time you walk by
He looked into the night's light
Does something to you, but hidesFeed the poor dog now (Hands don't stay long)
Feed the poor dog now (Hands don't stay long)He just don't get to tell her
Meanwhile I'm on a sad song
I slept in a mile from you
How great you looked, didn't you?Guess I sleep like the dark desert
Yawning the morn in the old den
Wake up with a monkey
Wanna see, wanna see, wanna see, wanna see it?It's fast and really great
Felt life when young and gray
And since then misbehaved
Knowing you're not so far awayFeed the poor dog now (Hands don't stay long)
Feed the poor dog now
Feed the poor dog...Drives himself by
Having been here for a while
Eating maggots in the jar
Every time I stop this carLess fast, I don't know your name
But with you it's just all the same
Went away for a night and day
Stayed till late too from the waitDrive myself by
But you know what no one else saw
Grabbed the rabbit by the leg
Sent it right to the fox's denFeed the poor dog now (Hands don't stay long)
Feed the poor dog now (Hands don't stay long)Drives himself behind
Never sleep with the deepest man
Who starts out with the smallest car
And now a piece of junkEating rabbits in the car
The night felt cold and hard
I resist to cry again
Getting used to keeping the woundThey never say what they mean
Never look them in the eye
Let them out, just find a way
Send them right to the rabbit's caveFeed the poor dog now (Hands don't stay long)
Feed the poor dog...
