

# 10 Seconds from the End

## Kataklysm

Cataclysmic detonation  
Inside the mind and the world of devastation  
We bring fire and power to revolution  
The earth shakes and trembles into isolation10 seconds from the end  
One chance to make it right  
10 seconds from the end  
One life to take it backIf you had one moment left before the end to repent  
And think of all your life  
Question things you've learned  
From all these distant memoriesThey say you learn till the end of time  
So, your mind is strong and wise  
Ironically my friend. it's always time to dieCataclysmic detonation  
Inside the mind and the world of devastation  
We bring fire and power to revolution  
The earth shakes and trembles into isolation10 seconds from the end  
One chance to make it right  
10 seconds from the end  
One life to take it back
