## **Cold Steel**

## **Nuclear Assault**

Hopelessly lost, a battle not won You're running in panic, Away from the guns Panic is striking at those all around Beware the Grim Reaper, He rests all aroundMy name is evil Soon you shall see You will obey me Or watch yourself bleedFight for your life, with cold steel at hand Run for the forest, live off of the land You'll seek the dark shadows for there safety lies It rests with the tarot, You hear the wolves cryMy name is evil Soon you shall see You will obey me Or watch yourself bleedStop for a rest, jump at all sounds Hot on your trail, pursuit all around You're leaping from cover, Your sword fills your hand You fight your last battle Make your last standMy name is evil Soon you shall see You will obey me Or watch yourself bleed
