Lacey

Massive

Doesn't matter how we met or even where we're going
But apparently from all accounts we're going all the way
Free from all the rules that tie everybody down
You're living like your dying, your feet don't touch the ground
You're my little secret, you never make a sound
Here we goFour on the floor always looking to score
Been there done that, come back for more
Honesty and reputations they're at hand
Come on Lacey, Play the bandNo one has to know what we are talking about
Cos if no one says a word then no one gets caught out
Never feel rejection you never are alone
Never have to deal with the problems you may cause
Here's my little secret that everybody wants
Here we goFour on the floor always looking to score
Been there done that, come back for more
Honesty and reputations they're at hand
Come on Lacey, Play the bandNow that we're alone you know you're welcome any time
You're ticking all the boxes, you're crossing all the lines
Sun is coming up baby you gotta go home
And live the double life, that nobody knows
You're my little secret that everybody wantsFour on the floor always looking to score
Been there done that, come back for more
Honesty and reputations they're at hand
Come on Lacey
