God from the Machine

Burzum

Hook:
You can make it alone, oh if you try
Till it be, come home. I know you'll sing it
You can make it alone, oh if you try
Can never see you're far till you make it out
But are you with em if I let it go?
You're either gonna rock the boat or help with them, handin out
Now you're somewhere removed
They think you got it while you're broke, well what you hashing up?
Something that you wrote is gonna make a good life quote, asylum from the tour
Rumbling below, said if not now you'll never go

So while we're waiting?
Hook 2x
It's why you know but you can't tell a soul, just where it is, you let it go for fear they'll turn it down
You can see through the smoke and though you know that something's broke you're holding on for now
Aiming for the mark. How is it that your scores light up like flashlights in the dark?
Leading with the heart, you know you're better from the start
Don't let it wear you down.
Hook 2x
Oh now you leave them alone?
I see you're on your own?you're on your own
Hook 4x
