How to Dream

Sam Phillips

When we open our eyes and dream
We open our eyes
When we open our eyes and dream
We open our eyesUnder normal we change the wind
Facing every direction
Planted in the future, we live two lives
All to reveal a secret we can't hideWhen we open our eyes and dream
We open our eyes
When we open our eyes and dream
We open our eyesWe search the sky, planets chasing the stars
Pulling towards deep affection
Weights and numbers measure a wound that won't heal
All to reveal a secret we can't hide
