

# Northern Lights

[Axel Rudi Pell](#)

Rain is falling down from new horizon  
We travel on across the seas  
Truth then dispense on the ocean  
The sirens call under a plea We're sailing in circles, almost blind  
We are at the point of no return The northern lights keep on shining  
Over the ocean and the sea  
The northern lights shine on forever  
The guiding light for you and me, you and me From far away we saw the rainbow  
Shimmering brightly across the land  
We call the rulers of the lenders  
Lead us to the world's dead end
