

Your Summer Dream

Beach Boys

Drive your car down to the sea
All the while you build a scheme
Take her hand and walk on with her
Make it real, your summer dream
Smell the warm and salty air
See a wave reflect a beam
Stop and find a pretty shell for her
Make it real, your summer dream
See another couple over there
To them an ordinary day
Soon you wonder where the time has gone
The sun has almost slipped away
Now it's gone and you're alone
In her eyes you see a gleam
Time has come for you to show your love
Make it real, your summer dream
Make it real, your summer dream
Make it real, your summer dream
