

On Your Side

A Rocket to the Moon

I know your face
Your eyes, your lips, your taste
I love the way
You know just what to say It was a Saturday
Remember it like yesterday
She knew my name
Imagine that I know this road
The way that no one goes So cold, so cold
Baby, you're so cold, so cold Take it easy, baby, we can make it right
Girl, you know my love is always on your side
Rest your eyes tonight
You know that my love
You know that my love is on your side I love your pretty face
And how it rests on your pillow case
We get in fights, you spend the night
And I don't see how we get this way
But I think we're alright So cold, so cold
Baby, you're so cold, so cold Take it easy, baby, we can make it right
Girl, you know my love is always on your side
Rest your eyes tonight
You know that my love
You know that my love is on your side Take it easy, baby, we can make it right
Girl, you know my love is always on your side
Rest your eyes tonight, rest your eyes tonight
Rest your eyes tonight My love is on your side
(You know that my love, you know that my love)
My love is on your side
(You know that my love, you know that my love)
Is on your side
