On Your Side

A Rocket to the Moon

I know your face Your eyes, your lips, your taste I love the way

You know just what to sayIt was a Saturday

Remember it like yesterday

She knew my name

Imagine that I know this road

The way that no one goesSo cold, so cold

Baby, you're so cold, so coldTake it easy, baby, we can make it right

Girl, you know my love is always on your side

Rest your eyes tonight

You know that my love

You know that my love is on your sideI love your pretty face

And how it rests on your pillow case

We get in fights, you spend the night

And I don't see how we get this way

But I think we're alrightSo cold, so cold

Baby, you're so cold, so coldTake it easy, baby, we can make it right

Girl, you know my love is always on your side

Rest your eyes tonight

You know that my love

You know that my love is on your sideTake it easy, baby, we can make it right

Girl, you know my love is always on your side

Rest your eyes tonight, rest your eyes tonight

Rest your eyes tonightMy love is on your side

(You know that my love, you know that my love)

My love is on your side

(You know that my love, you know that my love)

Is on your side
