

# Low Society

## Boiler Room

A judge a dentist or physician  
In this low society  
    Trade ambition for position

In this low society  
Have you heard it's in the stars  
    Next july we collide with mars  
    Have you heard it in the bars

In this low society  
No more pay and lots of leisure  
    In this low society  
    Low society  
I'm just doing what I can  
    In this low society  
    But I'm an incidental man

In this low society  
I give away what others sell  
    The secret's yours so never tell  
    'cos if you do you'll go to hell

Low society  
Side by side and always tired  
    All for one and no-one hired  
    All that's left is love inspired

Low society  
And when the party is complete  
    And you're still standing on your feet  
    The taste of victory is sweet

Low society  
And darling don't forget  
    In this low society  
    To turn off your t.v. set

In this low society  
The most important thing at all  
    In this low society  
    Is not to stand too tall

In this low society  
In this world that never learns  
    I can see rome as it burns  
    All the passion and the power  
    Turns to ash within an hour

No more play and no more pleasure  
    In this low society
