There Was a Time

Spock's Beard

These days are drifting through me
Like faces in the clouds
Memories lift me up
Stare me down
I open a window close the door
And watch the shadows cross the floor
Never talk too much about itThere was a time
When all of our dreams were spun like sunshine
Through a kaleidoscope
Lit the corners of our minds
There was a timeLove found us clear as diamonds
With eyes as bright as stars
Never thought that we'd
Fall that far
Our world was turning back around
And soon our feet would touch the ground
Never talked too much about itThere was a time
When all of our dreams were spun like sunshine
Through a kaleidoscope
Lit the corners of our minds
When I held her close on the day she left
And she wished me love and happiness
Now I wonder if I ever cross her mind
There was a time
