Miss America

Spin Doctors

Here she comesWords cannot describe what just befilled my eyes
I never saw a vision so beautified
I almost turned away to take the bad bouquet
And to a country raised her fingertips and tear filled eyesShe walked across the floor, the crowd called out for more
Flash boots froze their expressions in the limousine
Though I've been 'lone, I know I can subsist
Eh, it give me comfort just to realize that she existsOh, Miss America, look on me
I'm not the most handsome one you'll ever see
Oh Miss America, I love you
Though we may never meet my name's America
My name's America too, my name's America tooShe be putting lullabies on your lips
Oh, you saw enough to launch a thousand ships
You kicked her off to put your hands upon your hips
Let lonely take her to the places where the honey drips, yeahOh, Miss America, look on me
I'm not the most handsome one you'll ever see
Oh Miss America, I love you
Though we may never meet my name's America
My name's America too, my name's America tooHere she comes, Miss America
Here she comes, Miss America
Here she comes, Miss America
Here she comes, here she comesOh, Miss America, look on me
I'm not the most handsome one you'll ever see
Oh Miss America, I love you
Though we may never meet my name's America
My name's America too, my name's America tooHere she comes, Miss America
Here she comes, Miss America
Here she comes, Miss America
Here she comes
