

# Mayhem

## Jeff van Dyck

Endless war, endless screams  
In the boundaries of hell we live  
Total death, total hate  
On the devastated plains we fight  
Evil minds, insane minds  
Mutilated corpses over the ground  
Soldiers of hell, soldiers of death  
Seeking victims to exterminate  
Black death, black night  
Where the spirits leave their crypts  
Tortured souls, drifting souls  
By the world of hate  
Multi radiation, multi death  
Destroys and kills even in the deep of hell  
Fallen corpses, fallen angels  
Total injury is the only rule  
Mayhem  
Death slaughter, death rules  
Under the sign of fear we live  
Bestial lust, bestial rites  
Darkness send it's bestial warriors  
Shrill cries, tormenting cries  
Break the silence of the dark night  
Living with hate, living with death  
Giving the world total destruction  
Blood world, rotting world  
Corrosion of the insane human mind  
Black pest, devastating pest  
Under the evoking circle we pray  
Baptized skull, evil skulls  
People screaming, chained underground  
Mayhem
